Push Button Bleed Valve Upgrade
08B3-BL05 - M12 x 1.25 for Old Hydrotech Cylinder Valves

FITTING INSTRUCTIONS

1. First remove the existing bleed screw from the side of the Cylinder Valve.

2. Ensure the bleed screw port is clean and free from debris.

The BEST Fittings Push Button Bleed Valve comes pre-fitted with a crush seal for easy installation.

3. Screw the new bleed valve into the bleed valve port until finger tight against the seal, then rotate up to one turn clockwise with a spanner to orient in the desired position. The unit is now ready for use.
